

ROJALIN PANIGRAHY

SENIOR TEST ENGINEER

OBJECTIVE

To become a successful professional in an organization where my knowledge can be shared and utilized, and my creative skills can be maximized for the benefit of the organization.

EXPERIENCE

SENIOR TEST ENGINEER | MPHASIS | BANGALORE

Jan 2024 - Present

Client Name: Bio-Rad

- Collaborated with programme teams to adapt test case needs, rewriting to deliver optimal test coverage.
- Mentored junior test engineers, providing guidance and support to foster professional growth within the team.
- Devised innovative test automation programmes and upgrades to improve operational efficiency.
- Automated repetitive testing tasks using Selenium, reducing manual effort by 60%.
- Negotiated with stakeholders to define acceptance criteria for test phases, clarifying project objectives and deliverables.
- Created high-performing automated test scenarios, cases, plans and scripts to support improved engineering solutions.
- Developed robust reusable libraries through targeted, methodical object-orientated programming.
- Identified, documented, and reported bugs, working closely with developers to facilitate swift resolutions.
- Reviewed and updated test case documentation to reflect changes in product specifications and testing protocols.
- Optimized test coverage by identifying gaps in existing testing approaches and integrating new methodologies.
- Introduced a defect tracking system that streamlined the resolution process, enhancing team productivity.
- Improved test engineering capabilities, progressing quality assurance and software development strategies towards key business goals.
- Updated and added the KB articles as per the JSM.

ABOUT ME

Senior Test Engineer at Mphasis with extensive experience in quality assurance and software testing. Expertise in test automation, manual testing, and agile methodologies. Proven track record of mentoring junior engineers, optimizing test coverage, and implementing innovative testing solutions. Core competencies include Selenium, Informatica Power Center, IICS Cloud.

EDUCATION

April 2007

Bachelor of Science | Science
Education

SBRG Womens' College,
Brahmapur,

Brahmapur University

Aug 2017 - Dec 2023

- Worked with Postman to test API's and their functionality for various Tier 1 connectors
- Extensively involved in creation of DSS, DRS and Cloud Mapping designer tasks for various REST API's
- Created complex Informatica mappings to load data
- The mappings involved extensive use of transformations like aggregator, filter, router, expression, lookup, sorter
- Involved in integration and AUTOMATION testing of one of the most widely used various connectors (Jira, SharePoint, Zuora, Zendesk, Coupa, Eloqua, Adobe, Cvent, Xactly, Workday) on Informatica Cloud; thus, ensuring successful release
- Strong Experience working in an Agile environment with Agile process and principles
- Along with PO lead agile ceremonies like product backlog refinement, sprint planning, defining features, user stories, acceptance criteria, sprint review, release planning, story mapping, demo to stakeholders
- Detailing epics/features, prioritizing and ensuring the feature readiness with emphasis on the customer experience, review backlog items during refinement and accept the ones that are ready
- Proven track record to maintain alignment across many times zones
- Managing ongoing communications between product and scrum teams and other product stakeholders
- Documenting all the activities performed during the release
- Developing and maintaining Robo UI and Backend REST API automation suites for the ecosystem's owner
- Worked for DLT, PAY Go and ProductX (CDI-PC)

SKILLS

- Test Automation
- Quality assurance procedures
- Corrective action execution
- Test procedures
- Project Planning
- Meeting participation
- SQL knowledge
- Usability Testing
- Automation expertise
- Quality Compliance
- Regression Testing
- QA Management
- Writing test cases
- Defect tracking
- Informatica Power Centre
- IICS Cloud
- JIRA
- Selenium
- Linux
- Knowledge transferability
- User acceptance testing
- Integration Testing
- Test case design
- Agile methodology
- Manual Testing
- White Box Testing
- Basic Java

SYSTEM ADMIN | INFORMATICA | BANGALORE

Mar 2016 - Jul 2017

- Owner of multiple eco systems and working and supporting on both cloud and on premise
- Understand key customer requirements, develop test scripts and partner with development and Product management to ensure the product is delivered right
- Experience in leading process improvement efforts
- Experience developing and testing entire system software with various capabilities
- Owning, building, and managing QA teams to a level of world class professionals
- Tracking product functionality and performance to ensure that it meets customer/market needs
- Proven track record in testing and automating use cases for products / components with quality ownership
- Cross team collaboration with various engineering teams and POs
- Involved in end-to-end testing: Test case identification, Test plan preparation, Functional, Integration, UI, Regression and Upgrade testing
- Responsible for running the Regression using PMATT Tool and monitoring the result for all connectors

Oct 2013 - Dec 2014

- Facilitated knowledge sharing sessions among QA team members to enhance skills and improve testing outcomes.
- Utilised a variety of testing tools and methodologies to enhance the efficiency of the QA process.
- Implemented best practices in test automation to reduce manual testing workload and improve accuracy.
- Participated in regular team meetings to discuss progress, challenges, and strategies for improving product quality.
- Contributed to the refinement of QA processes and procedures, aiming for continuous improvement in testing activities.
- Demonstrated commitment to professional development by attending workshops and certifications in quality assurance and software testing.
- Played a key role in the successful launch of multiple software products by ensuring thorough pre-release testing.
